## SYSTIMAX 360 Evolve Patch Panel Update

Global

Current

New

CommScope will be making a cosmetic change to the SYSTIMAX 360 Evolve series of copper patch panels. The rear cable management troughs, which are currently black as shown in the image above/left, will be changing to a transparent material as shown in the image above/right. There will be no impact to the functionality or strength of the troughs.

The change is being made due to current supply chain shortages of the black resin, which are forecasted to continue into 2022. The outlook on the future availability of the clear resin is more positive; therefore, this change will help strengthen our supply chain for Evolve panels into 2022.

Customers can expect to see the new clear troughs as early as August 2022. Specific timing will vary by region, depending on the inventory levels of materials. There will be no change to MIDs or pricing.

Affected MIDs are shown in the table below.

MID	Description
760152561	360-IPR-1100-E-GS3-1U-24
760152579	360-IPR-1100-E-GS3-2U-48
